

Aperam publishes its “made for life” report for 2018

Luxembourg April 19, 2019 (7:00 CET) - Aperam, a leading global producer of stainless and specialty steel, today publishes its ‘made for life’ report, which constitutes Aperam’s sustainability performance report for 2018.

Built on stakeholder inclusiveness and materiality, this report follows the GRI sustainability standards. It has been reviewed by an external audit firm¹ to confirm its compliance with the GRI protocol, including the reporting of material sustainability performance data such as safety results (LTIFR rate), CO2 intensity, energy intensity, water withdrawals and air emissions.

“Aperam’s commitment to sustainability is rooted in our values and in our mission to manufacture infinitely recyclable products in a responsible manner. Once again, our 2018 Sustainability report demonstrates that this commitment embraces all dimensions of our corporate responsibility and confirms the trust that our employees and external stakeholders place in Aperam. It also highlights the risks for both the industry and climate change, when responsible products have to compete with imported steel from countries with less advanced sustainability standards,” Timoteo Di Maulo, CEO of Aperam, commented.

Aperam’s complete report is available on www.aperam.com under section sustainability. It is composed of the “made for life report” and online supplements, including three country supplements to be released shortly.

About Aperam

Aperam is a global player in stainless, electrical and specialty steel, with customers in over 40 countries. The business is organized in three primary operating segments: Stainless & Electrical Steel, Services & Solutions and Alloys & Specialties.

Aperam has 2.5 million tonnes of flat Stainless and Electrical steel capacity in Brazil and Europe and is a leader in high value specialty products. Aperam has a highly integrated distribution, processing and services network and a unique capability to produce stainless and specialty from low cost biomass (charcoal). Its industrial network is spread in six production facilities located in Brazil, Belgium and France.

In 2018, Aperam had sales of EUR 4,677 million and steel shipments of 1.97 million tonnes.
